Subject: Get ready for 24 February 2025
Date: 31 January 2025 18:00:26

Dear colleague,

In advance of the Procurement Act coming into force on February 24th, Welsh Contracting Authorities will be required to register on the UK Governments Central Digital Platform. Welsh Contracting Authorities will be able to register from the 3rd February and to support this process, UK Government have issued the attached communications which sets out the process by which they will enable advance registration for Welsh Contracting Authorities to the Central Digital Platform (CDP).

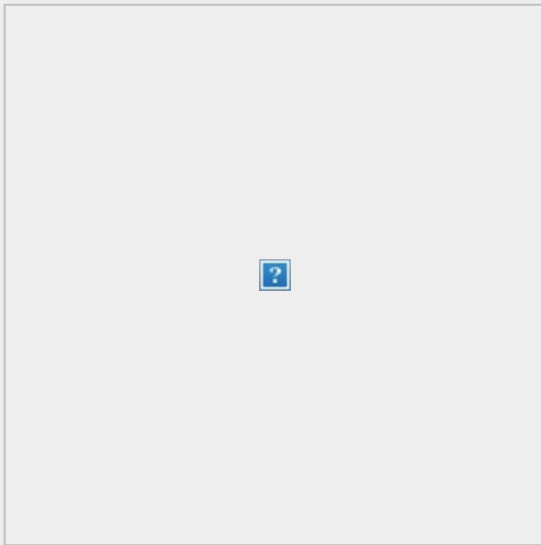

It is important that you establish in advance who within the organisation will be responsible for setting up your organisation, and that only this agreed organisational representative carries out this task, as the initial creation of an organisation is irreversible.

In preparation, you should agree internally who your first administrator will be, as they will be responsible for registering your organisation. This person will then be able to authorise other individuals from your organisation into your organisational profile.

For more information, please contact the Cabinet Office using the details in the attached document.
